

JOIN THE BIOBASED INNOVATION STUDENT CHALLENGE EUROPE

EXTENDED DEADLINE

2022

Do you want to design a creative bio-based solution in a multidisciplinary student team? The Bio-based Innovation Student Challenge Europe (BISC-E) encourages students to explore the emerging bio-based work field while developing a new bio-based product or process. Are you up or the challenge? Register now!

The Challenge

All teams develop a bio-based innovation (product or process) and present their ideas to a jury of experts from academia and industry. The presentation must be accompanied by a few supporting documents explaining sustainability, technical feasibility, and economic viability of your innovation.

Who Can Apply?

The challenge is open for final year students of college/universities of applied sciences and all university students (BSc and MSc). Due to the multidisciplinary character of the challenge, it is recommended to embody multiple disciplines in your team, of which exact science should be one. Team members can come from different institutions

Organisation

The Italian national competition is organized by Prof. Salvatore Fusco on behalf of University of Verona, Department of Biotechnology.

Everybody wins!

Participating in BISC-E will give you valuable experience in the emerging bio-based work field, in developing a new product or process with all its aspects and in presenting innovative ideas for a panel of experts. On top of that there are nice prizes to be won. The first team wins € 1000 and gets to represent Italy in the European final.

**Join our kick-off, get inspired
and find possible teammates!**

27 June 2022	Registration deadline
30 June 2022	Kick-off with all participants
07 July 2022	Submission of presentation and supporting documents
21 July 2022	Presentation and Italian Final
Autumn 2022	EU final (location to be decided by Biobased Industry Consortium)
